

Madison State Hospital

MADISON STATE HOSPITAL Facility Fact Sheet 2014-2015

2012 and 2013 The Joint Commission “Top Performer” in Key Quality Measures

In 2005, the hospital moved into its state-of-the-art treatment facility overlooking the Ohio River. The design blended historic restoration, renovation, and new construction. With the exceptional innovation in design, daylight and views, recycling, and energy efficiency, MSH was one of the first psychiatric hospitals in the country to gain certification for “Leadership in Energy and Environmental Design”.

The entire 120 bed hospital maintains Center for Medicare and Medicaid (CMS) Certification and Joint Commission Gold Seal Accreditation. Since 2007, MSH served in national leadership roles in the piloting and implementation of The Joint Commission’s Core Measures for inpatient psychiatric hospitals and was subsequently named a Joint Commission 2012 and 2013 “Top Performer”. Our current Core Measure Accountability Rate is 100%. MSH continues as a state and national leader in healthcare technology, evidenced-based clinical practices, cost containment strategies, data-driven decision making, reduction in staff overtime, and elimination of excessive use of medications.

Accreditations:

- *Center for Medicare and Medicaid (CMS) Certification**
- *Perennial Joint Commission “Top Performer” Recognition since 2012.**
- *Current 100% Accountability Rate**

Madison State Hospital serves adults struggling with the most severe mental health challenges. Every patient works with a specialty trained psychiatric physician who leads a multi-disciplinary team of licensed nurses, psychologists, social service specialists, rehabilitation therapists, behavioral clinicians, and behavioral health recovery attendants. Services for medical specialty care, dental care, dietary counseling, physical therapy, occupational therapy, speech therapy, and pastoral counseling are readily available. Unit names, such as Recovery Road, Healing Heights, and Journey Way reflect our philosophy of recovery based psychiatric treatment. Evidence-based treatment modalities offered include, but are not limited to:

**Dialectic Behavioral Therapy (DBT),
Illness Management Recovery (IMR),
Cognitive Behavioral Therapy (CBT),
Motivational Interviewing (MI), and emerging
Integrated Dual Diagnosis Treatment (IDDT).**
